- Passenger assistance during the check-in process and luggage handling.

EDUCATION

CUCosta, Puerto Vallarta: Computer Systems Engineering

JANUARY 2022-JUNE 2026

CONALEP 2, Puerto Vallarta: Automotive Engineering Technician

AUGUST 2009-JULY 2012

PROJECTS

Business Management Application: Android / Kotlin

- Developed a mobile application for order and expense management using Kotlin, Jetpack Compose, Room, and SQLite.
- Implemented order creation, editing, tracking, and payment management.
- Added PDF ticket generation for business operations.

PulseUp: Flutter / Dart

- Developed a gym management mobile application using Flutter and Dart.
- Integrated authentication and REST APIs for user features, routines, progress, store, and check-in.
- Connected the mobile application with backend services to retrieve and manage application data.

Robotic Arm: C++ / Arduino

- Designed and built a robotic arm controlled through hand movement.
- Implemented video capture, real-time signal interpretation, and servo motor control.

Gladiola, 149
